

Using your Registered Credential

Now that you have installed the Symantec VIP application or received your Hardware Token Card and registered your credential, you may now use the randomly generated 6-digit Security Code to log into selected KBR applications. You may test with the following site, to ensure your registered credential is working.

XNET and KBR users:

1. Before testing your credential, close all internet browsers that are open.
2. Launch a new internet browser session.
3. Go to <https://2fa.kbr.com>.

The screenshot shows the Symantec VIP Self Service Portal. At the top, there is a yellow banner with the Symantec logo and the text "VIP SELF SERVICE PORTAL" and "KBR". Below the banner, the text reads "Welcome to the Symantec® VIP Self Service Portal" and "To access the Self Service Portal, enter your user name and password, and click Sign In." The main content area is a "Sign In" form with two input fields: "User Name" containing "xkd7602" and "Password" with masked characters. Below the fields, it says "Enabled by:" followed by the Symantec Validation & ID Protection logo and a "Sign In" button.

4. Enter your **XNET or KBR Network User ID and Password**. Select 'Sign In.'
5. To complete your sign in, enter your randomly generated 6-digit security code from your newly registered credential (mobile device, desktop computer or hardware token card), and select 'Continue.'

To Complete Your Sign-in

For your protection, first confirm your identity by entering a security code from your credential that has **already been registered** to your account.

The screenshot shows the "Confirm Your Identity" page. It prompts the user to "Enter a security code from this credential:". Below this, it displays the following information: "Credential Name: Hardware Token Card", "Credential ID: NSEU002086", and "Credential Type: VIP Credential". There is a "Security Code" input field containing "428764" and a "x" icon to clear the field. Below the input field, there is a link "What is a Security Code?". At the bottom, there are "Cancel" and "Continue" buttons, and a "Trouble signing in?" link.

6. If all of the fields above are entered correctly, you will be granted access.
